DETAILED ACTION

Please update the parent application serial no 09/492,554 is not US Patent No. 6270128.

The use of the trademark SPECTRA, VECTRAN, KEVLAR has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5, 6, 10-16, 17-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Please note that "rope like" is indefinite as claimed in claims 5, 6, 10, 11, and 15.

In claim 6, line 2 and claim 17, line 8, "relatively" is an indefinite term.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Armour.

Armour discloses a soft link 70 with a looped first end (56, 57 together, see figure 4), second end 53 that is looped with tabs 80 attached to the second end. The soft link is made out of rope material/nylon.

Please note that the intended use of attaching the riser to parachute suspension line or bridle cord to the canopy, carries no patentable weight. Besides, the system of Armour can be used to attach these elements together.

Re claims 16 and 17, it would have been obvious to one skilled in the art at the time the invention was made to have used bartack thread in Armour's system since this is merely a substitution of parts. Further, the criticality of using bartack thread has not been disclosed.

Re claim 21, please note it would have been obvious to one skilled in the art at the time the invention was made to have used labels in Armour's system to provide instructions or advertise the brand.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Calthrop, Palmer, Cole, Dennington, Cristea, Snyder, Gray, and Brownell disclose attachment means.
